

# Independent Audit

**1.** First  
Inventory  
Document  
Set

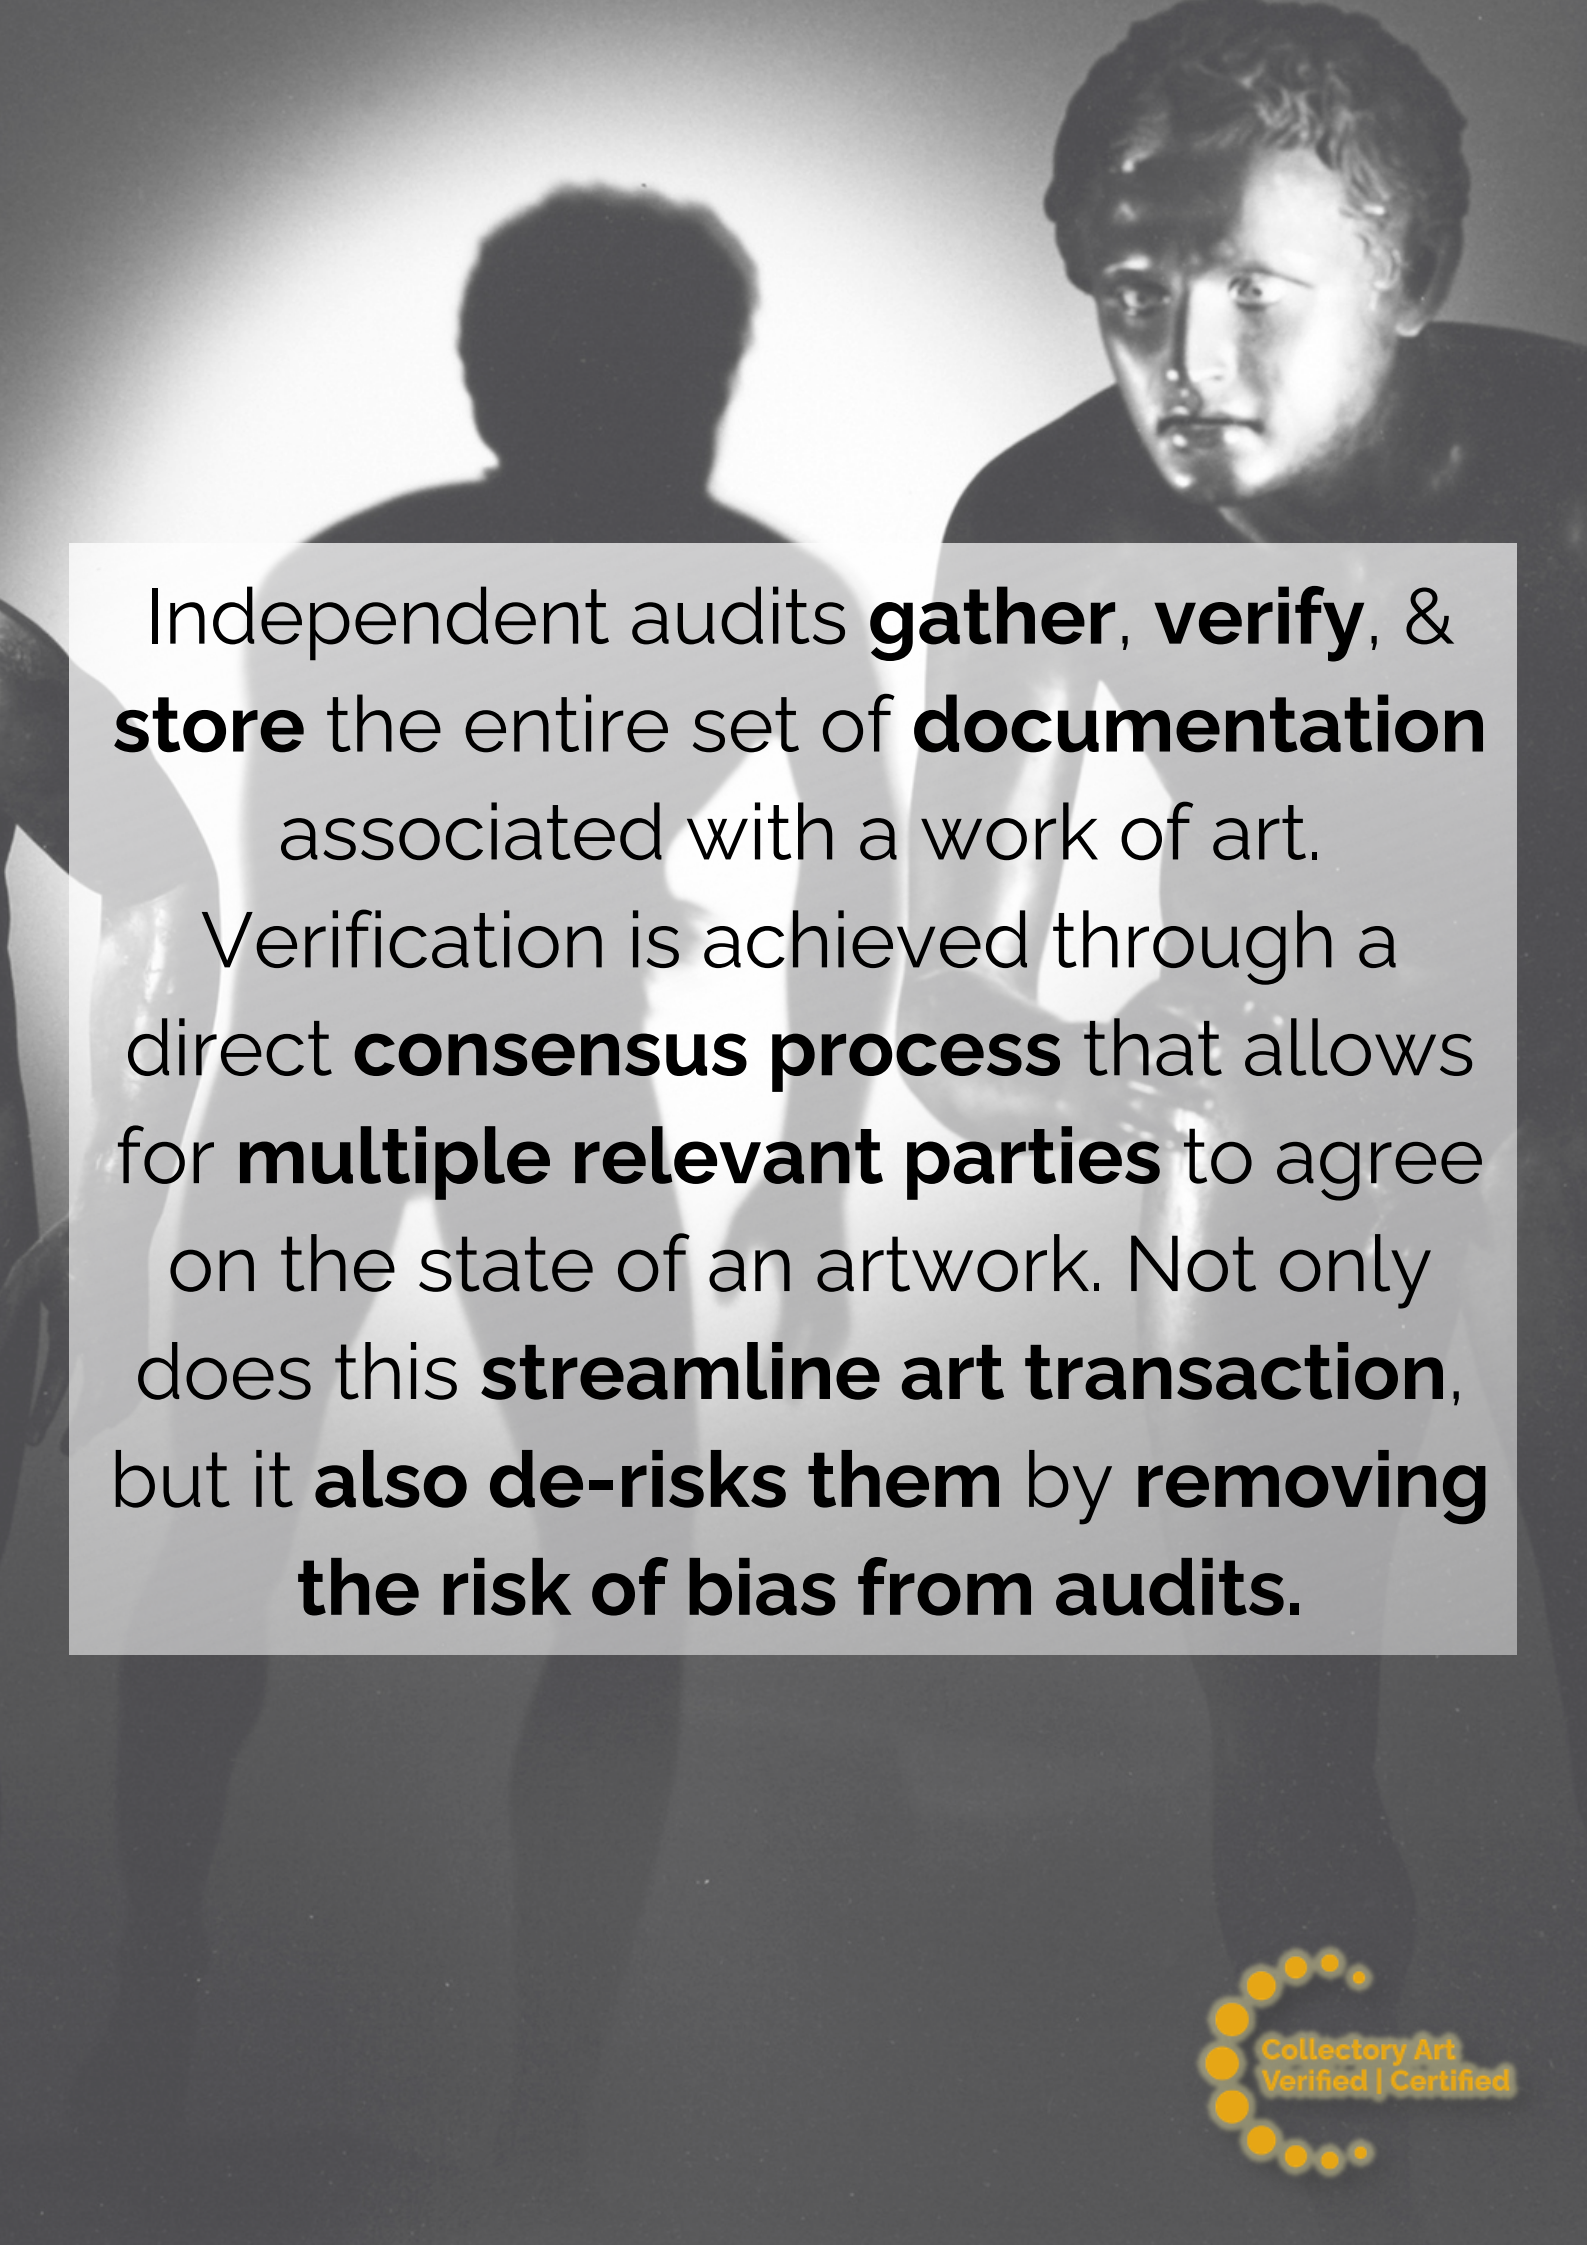

**2.** Pre-Audit

**3.** Audit And  
Validation

**4.** Final Review

**5.** Ready For  
Collectory  
Certification

Independent audits **gather, verify, & store** the entire set of **documentation** associated with a work of art.

Verification is achieved through a direct **consensus process** that allows for **multiple relevant parties** to agree on the state of an artwork. Not only does this **streamline art transaction**, but it **also de-risks them** by **removing the risk of bias from audits**.

- **Independent** in-field audit and verification of property, authenticity, provenance and timeline of **tracing relevant missing documents**.
- **Inventory** and **structuring** of **ALL documents available**, concerning the work of art and collection.
- Professional **Hi-Res photo shoots**, if missing.
- **Identification** of critical **missing documents**.
- **Sharing** of audit results/report.
- **Highlighting** of exceptions and implications.
- **Review and organization** of verified documents.
- **Organization and nesting** of documents, selection of most relevant.
- **Closing** verified set of property, provenance, authenticity and logistics docs
